SINCE 1936

# CZ 805 G1

Multi-purpose single-shot grenade launcher

The CZ 805 G1 grenade launcher in 40x46 mm is a result of the development concentrated on the next generation of service weapons made by Česká zbrojovka a.s., Uherský Brod, Czech Republic.

It is a light weapon designed for destroying armoured targets, personnel and military equipment located in an unenclosed ground or field-shelters. The CZ 805 G1 grenade launcher can safely fire a wide variety of modern standard grenades of 40x46 cal.: cumulative, armour-piercing, fragmentation grenades as well as special types (thermobaric, smoke, illuminating, incendiary, chemical and others).

The weapon excels in its simple and reliable construction, high-tech production technology and ease of use with maximum safety for the shooter. Loading and extraction of the fired cartridge is carried out from the rear, with the barrel tilted to the side. The direction of the tilting of the barrel is adjustable by changing the orientation of the locking lug, which allows

adapting the grenade launcher for both a left-handed and a right-handed user. The trigger guard can be turned to the left or the right by 90 degrees, to facilitate shooting in gloves.

Safety features are transversely shifted manual safety of the trigger and automatic firing pin block.

The CZ 805 G1 grenade launcher can be used either separately or as underslung weapon of the assault rifle, primarily for the CZ 805 BREN A1/A2 models made by Česká zbrojovka a.s.

When used separately the grenade launcher is through the MIL-STD-1913 interface mounted to the carrier outfitted with handle, folding and removable shoulder stock.

## Technical Parameters

Model	CZ 805 G1
Calibre	40x46
Max. Effective Range – Point Target	150 m
Max. Effective Range - Area Target	350 m
Overall Length (mm)	413/664
Barrel Length (mm)	250
Height (mm)	180
Width (mm)	100/63
Weight (kg)	2.23

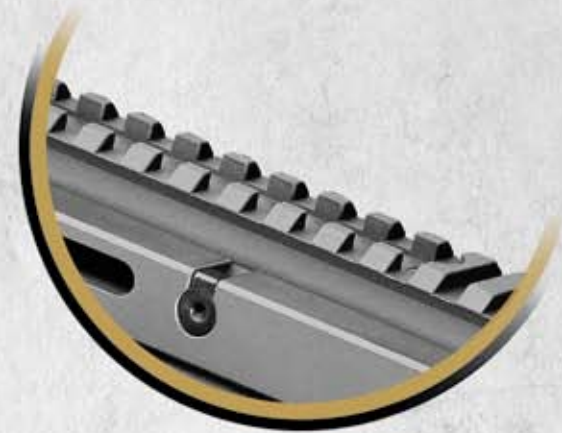

The barrel in the open position ready for loading

Folding removable shoulder stock (compatible with CZ 805 BREN)

The mounting rail in accordance with MIL-STD-1913 of the grenade launcher for accessories attachment (mechanical sights and others)

The trigger guard has the option to be pivoted to both sides thus facilitating shooting with gloved hands

Three screws for the grenade launcher mounting to the rail according to MIL-STD-1913 (here to the grenade launcher carrier)

Manual safety of the trigger
